

ROADMAP

The World Inu Dog swap Exchange, WIDSWAP will launch on 13th November 2022. We will be fundraising for this through WID token sell. The WID token will be the operational fuel and native asset of the WIDSWAP platform. The liquidity pool on WIDSWAP will be designed in a way that incentivizes crypto liquidity providers to stake their assets in various pools and also to encourage listing and trading. The WID token will be optimized for earning a share of the trading fees and other various staking rewards. When a user supplies a pool with liquidity on WIDSWAP, the provider is rewarded with WID liquidity provider tokens. These WID tokens are valuable assets and shall be deployed as NFTs to allow for robustness in spread earnings and shall be used in its own right as a valuable investment asset throughout the WIDSWAP ecosystem and beyond.

Crypto liquidity providers will receive WID tokens in proportion to the amount of liquidity they have supplied to the pool. When a pool facilitates a trade on WIDSWAP, a fractional fee is proportionally distributed amongst the WID token holders. For the liquidity provider to get back the liquidity they contributed (in addition to accrued fees from their portion), their WID tokens will then be redeemed through the usual process of removal of liquidity. WIDSWAP promises to be a highly advanced version of a DEX, building in recent innovations in DEFI technology built on the Ethereum blockchain.

OPERATIONAL FRAMEWORK OF WIDSWAP PLATFORM

To understand the proposed WIDSWAP platform, we need to take a look at the current state of trading on some DEX exchanges. Most tokens trade within given price ranges on the familiar decentralized exchanges, which implies that users provide liquidity evenly along all of the markets' price curves, resulting in capital inefficiency. WIDSWAP seeks to

address this situation by providing what we describe as “embodied liquidity”, which is a built-in dynamic algorithm that provides pools with the flexibility to supply liquidity within specific price ranges.

Segregation of price range to provide liquidity will be the strength of the WIDSWAP platform. Hence, efficiency of allocation of capital resources is achieved at optimal liquidity range notation towards earning of highest trading fees. This will also ensure optimal operations in execution of trades while constantly maintaining a portfolio embodied platform that is heavily exposed to investors chosen assets while also mitigating downside price risks. As mentioned earlier, the WIDSWAP platform will incorporate the element of NFT which will be innovative. This concept will be built around the WID token element as the store of value of the investor’s liquidity position, as a against traditional concept of using basic fungible token!

The WIDVERSE

The World Inu Dog project will develop its own Metaverse, called the WIDVERSE where developers in the crypto space can own and build a business and establish their own legacy of wealth creation, consolidation and transfer.

The WIDVERSE virtual world will afford users the opportunity to create and play games, to own property, to buy and sell digital assets, going or vacation, create a unique country with the usual government organs, with its own president and citizens, and go on a safari and partake on virtual adventure like scaling Mount Everest, deep diving the ocean and even breeding digital animals and developing their on unique NFTs which can then be sold on the WIDSWAP. The experience, like never before will encompass different aspects of social media, online gaming, augmented reality (AR), virtual reality (VR), and digital currencies.

People will be able to use the WIDVERSE digital space to interact in ways that will enhance user experience, and create a habitat of wealth tools and capabilities for the investor. The WID coins will be the central part of the WIDVERSE, where people can live, work, and play in the digital world. The project aims to build a unique experience, where every individual can create their own virtual world and live, fulfill their own desires for excitement and wealth! WIDVERSE is the next ecosystem of the internet and online 3D virtual environments, accessible via virtual-reality headset, augmented-reality glasses, smartphones, PCs, and game consoles. The WIDVERSE will enter into partnership with vendors to produce its own special effect gaming consoles and headsets for enhancing the experience of users on the WIDVERSE.
